Job Preference:

- I am looking for a job on S/W Testing or relative management roles, including but not limited on QA Manager、 ATPT, Automation Expert or PMPL etc.

Work and Projects Experience：

Project Period	2018.04 – Now -
Project Name	DataCentre Management System
Roles	SSE、Coordinator
Description	Join GDS since this time and take care all the test jobs related individually. The GDS data centre management system was combined by BMS, Warming & Risk Management, DCFM, EOP, PPM, SMS, ECC etc. during this period, I set up a whole test architecture, including test management platform, test flow, test strategy as well as sorts of test sets. And all of these jobs are able to follow up well the GDS system test required.
Achievement	Know and familiar with all the GDS system as well as the basic industrial knowledge. And work on manual with these outputs - TS, TP, US, UC, TC, and work on Automation with the common functions and daily reports. Personally, all of these daily routines did help me to enhance further my Automated skills and test experience.
.	

Project Period	2015.10 – 2017.03 -
Project Name	KB Modelling
Roles	KB Developer、Test Expert
Description	This is a B2C project from HPE internal. It aims to convert all HP products into the website records which mainly services on HP internal depts. such as the Sales and Marketing. And help them to know more well about HP products, so that they could more easily to carry out their works. What we need to do in this project is to config. well each of product component based on its spec. In a particular, working under the java environment and using the special add-ins such as, KES and NGC to config HP products and then generate a file with suffix ser for downstream systems. (By the way, KES and NGC are the special Java package which come from HP and focus on products level logical description, we need to load them into the eclipse platform before using.)
Achievement	

I am a good quick learner. My rich experience between SW and HW help me to grow fast and then growth an excellent KB developer. So far, I 've already successfully delivered over ten products by myself. For moreover, I also take the test tasks from this project.

Project Period	2014.01 – 2015.10 -
Project Name	GRC、MDM、ITI
Roles	ATPT Leader、Test Expert

Description   During this time, I played as an ATPT Leader for GRC, MDM and ITI domain projects. My responsibility here is to take good care of our test daily routine, and ensure our tasks as going as ATPT test strategy – for more details, it includes to define the **Test Metrics**, **Automation Frameworks** , **Script Sample**, **Regression Test Criteria**, **Task Assignment** as well as the test **loading Estimate,** and so on. personally, this role not only promote me to get deeply acquaint automation test, and also help our team to show more value-added than others. Do an interpretive first, What's the GRC, MDM and ITI domain? From test aspect, GRC mainly deal with the E2E test Cases as well as its automation test. MDM focus on the data validation which comes from Master data and HP cloud relevant projects. And the ITI projects means that it comes to HP IDA systems. And for this kind of projects we pay more attention on its stability and compatibility test.

Achievement   By our effort and contribution. We developed the new test framework, Customized test reports, delivered high quality test result and build our own test exhibition site, etc. And some value-added creation in ATPT have been used by other teams till now.
Here are some typical projects we successfully delivered on ATPT during this time.
- Master Data management - Sales Organization and Sales Territory – --50% convert rate
- Master Data management – MDAS - 60% convert rate to automation
- Master Data management – Customer – 100% convert to AT
- CID Person - SAP type – about 40% to AT (all relevant SAP TCs can convert at all – QTP、SAPTAO)
- Sales Programme Management Release 7 – almost 50% TCs converted

Project Period	2007.05 – 2013.12 -
Project Name	Sales-IT、ITI-IT Series Projects
Roles	Automation Expert、PL/Team Coordinator

Description   At the beginning of joined HP, I played as a SSE and take part in sorts of test jobs which comes from multiple domains. Having worked with the excellent co-worker, I learn more and grow more. Obviously, this is an important period to me to become into a real QA player. I do my best and suck up the knowledge which was fresh to me. Based on the assignment, I practiced strictly by HP standard, test flow and definition. Moreover, I also pay more attention on Automation test, upon the projects experience accumulate, I got rapid progress on my Automaton skill on **QTP, UFT, LR, SP, Python, Selenium** and **QC/ALM** etc. And with my hard work, I promoted to be the Team leader of MDM/ITI domain test team at last.

Achievement	A lots of project I experienced this time, here are some typical projects I experienced that can state what we did extremely good on testing area –

- 100% convert the CRS, MyCRS into the Automation scripts;
- 2. High quality complete projects CMU R1/R2/R3 and convert 70% TCs into the automation scripts;
- 3. High quality complete SPT R1/R2 projects and convert 60% TCs into the automation scripts;
- 4. 100% convert MyComp projects into the automation scripts;
- 5. All TCs based on Web service converted to LR scripts for performance testing.

Project Period	2005.05 – 2007.05 -
Project Name	R50、R50e、T43、T43p
Roles	SSE
Description	My responsibility here is to focus on the system integration work. In a particular, based on the customer's requirement (order) to set up our PC. And then build up an appropriate image by IBM ITC platform for this machine. Once done, Usually, a basic compatibility test need to launch as well. And validate whether my built O.S match well with the built H/W. Sometimes, as concerned as the product stability, a performance test was required to plus as well.
Achievement	Having worked here, I acquired some skills and knowledge on IBM platform ITC/MOPS. And further know well the sorts of components of PC, be more familiar with the PC peripherals and its performance index. Know how to build a PC and know how to optimize a PC performance. During this time, I delivered these new products separately -

- T43
- T43p
- R50
- R50e

Work Period	2002.03 – 2005.05 -
Products Class	MB、Smart Card
Roles	SSE、TL
Responsibility	Without no doubts. Here is the real starting point of my career life. Working in here I learn more about how to test a new product from different aspects. How to supervise the pilot run team as went as ISO-9001, And how to coordinate with different dept. Throughout my effort here in years I grown up from an intel model key engineer to grow a team leader and promote to be the NPI Vice manager finally.
Achievement	Reviewed my path in this company, several outcomes deserved to highlight here -

- Activity take part in the A-system and PLMM system test jobs and dry run this system in our NPI dept. And the same time, I also be a key person of QA-8000 system in NPI dry run.
- Launch and rich the NPI test types, such as -
    1. Basic Function Test、
    2. Compatibility Test、
    3. Reliability Test、
    4. Stability Test
    5. EMI/EMC

6. Aging and vibration test etc.

Skills and Speciality：

•	Agile (Scrum/Sprint)	Expert	•	VB Script	Expert
•	PMPL	Veteran	•	QA、Tester	Expert
•	HTML、JS、Json	Veteran	•	QTP、UFT	Expert
•	SAP Automation	Expert	•	LR、Jmeter	Veteran
•	ActiveX	Medium	•	Python	Veteran
•	Web Services	Medium	•	DevOps、Docker	Veteran
•	Selenium	Medium	•	ALM、QC	Expert
•	SP、SAP、TAO	Veteran	•	DM	Expert
•	Team Management	Veteran	•	Clear Case	Veteran
•	SVN	Veteran	•	ISO、CMMI	Veteran
•	PS	Veteran	•	Web Driver	Expert
•	Oracle、SQL	Veteran	•	Java	Veteran
•	SoapUI	Veteran	•	Restful	Veteran
•	HAVEn	Medium	•	Unit Test	Expert

Education:

Master – MBA UESTC (University of Electronic Science and Technology of China) - 2015

Graduated – Compute Software major – (Peking University ShenZhen Education School) – 2008

Graduated – Computer Application major – (HuBei Polytechnic University) – 2000

Certifications：

2012 - 01	PMPL Certification
2011 – 10	SLI Excellent Performance Acquisition
2010 – 10	HP Best Performance Employee Award
2006 – 07	ISTQB
2004 – 12	Best Performance Award
2002 – 12	Excellent Employee Award

Language：

Language	CET-6、Mandarin

Others：

- I am Alan, a nice guy and with a good temper. Highly-motivated and reliable person with excellent health and pleasant personality. For friends, I always bring them the positive energy to be frank, sensible and relax, to be work, I always be full of the enthusiastic, hearty and original to show my best. I love reading and handwriting. Sometimes, I also enjoy the DIY to do some artificial for my kids. Besides this, I also

love to regard the IT information, as well as the guru's blog. Of course, more than these habits, I am a good fast learner.

- Having been worked in test field for years, I found that I more and more love this job. My rich experience accumulated to be confidant me that I am able to take good care of any roles from this fields. Just like the **QA**, **Automation Expert** or **PMPL** and so on. That's me, an old boy in sincerity and worth to be a friend. Come on, join me and accept me, let's work together to make a better tomorrow!
